# DEEPA LOKESHA

Embedded Systems / Hardware Engineer | Embedded C/C++ • PCB Design (Altium) • Hardware Bring-Up & Debug

+1 (215) 433-8837 | deepalokesha2002@gmail.com | linkedin.com/in/deepalokesha | github.com/Saideepa10 | Philadelphia, PA

## EDUCATION

**University of Pennsylvania** — Philadelphia, PA

*Master of Science in Engineering (MSE), Electrical Engineering | Aug 2025 – May 2027 | GPA: 3.30/4.00*

**REVA University** — Bangalore, India

*Bachelor of Technology, Electronics and Communication Engineering | Dec 2020 – Jun 2024 | GPA: 8.77/10.00*

## TECHNICAL SKILLS

**Embedded & Firmware:** Embedded C, C/C++, FreeRTOS, Zephyr / nRF Connect SDK, Real-Time Systems, Register-Level Firmware, Secure FOTA (MCUboot/OTA)

**PCB & Hardware Design:** Altium Designer, Schematic Capture, 4-Layer PCB Design, Power Management (LiPo/Buck-Boost), Hardware Bring-Up & Debugging, LabVIEW, MPLAB

**Protocols & MCUs:** SPI, I2C, UART, MQTT, CoAP/DTLS, BLE, Wi-Fi, ADC/DAC, GPIO · ARM Cortex-M, SiWG917, ESP32, nRF7002/5340, ATmega328

**Cloud, Tools & AI:** nRF Cloud, Memfault, Node-RED, Azure, Git, VS Code, Python, MATLAB, PID Control, Sensor Fusion, ML Fundamentals, Oscilloscope & Thermal-Camera Diagnostics

## EXPERIENCE

**Accenture Solutions Pvt Ltd** — Jul 2024 – Jun 2025

*Packaged App Development Associate* — *Bangalore, India*

- Completed 340+ hours of backend engineering training (Java, Spring Boot, RESTful APIs, Agile/DevOps); applied Git, SDLC practices, and systematic debugging across cross-functional delivery teams.

**Vikram Sarabhai Space Centre (ISRO)** — Aug 2023 – Sep 2023

*Project Intern* — *Thiruvananthapuram, India*

- Architected an FPGA-based FIR filter (Verilog/VHDL) to eliminate 1–2 kHz beat-frequency interference in capacitance-to-voltage propellant-level sensors on semi-cryogenic launch vehicles; validated in MATLAB and Libero SoC with a 4-member team.

**Bharat Electronics Limited (BEL)** — Jul – Aug 2023

*Intern — Electronic Warfare & Avionics* — *Bangalore, India*

- Observed end-to-end PCB fabrication (chemical etching, drilling, lamination, surface finishing) on high-precision industrial equipment, with exposure to radar, avionics, and signal-processing systems.

## PROJECTS

**RunFast — Custom-PCB IoT Gait-Analysis Wearable** — Jan – May 2026

- Designed the complete 4-layer PCB in Altium (schematic capture, component placement, routing) around a Silicon Labs SiWG917 (Cortex-M4 + Wi-Fi), an LSM6DSVETR IMU (I2C), dual FSR sensors via an AD8606 front end, and BQ24075 + TPS62082 power.
- Assembled and soldered the full hardware stack, validated IMU and dual-FSR sensor performance through bench testing, and built the Node-RED/Azure MQTT dashboard for live stride-metric visualization and session logging.
- Diagnosed and recovered a hardware bring-up failure with zero board respins — isolated an excess current draw to a swapped op-amp VCC/GND footprint using an oscilloscope and thermal camera, then fixed it with trace cuts and jumper wires.

**DrySpool — Connected Filament-Storage System** — Sep 2026 – Present

- Building a Nordic-based connected filament-storage system (nRF7002 DK, Zephyr / nRF Connect SDK) in a 3-person team — environmental sensing with dehumidification, NFC spool ID, Wi-Fi telemetry to nRF Cloud (CoAP/DTLS), and secure signed OTA firmware updates (MCUboot, verified rollback).

**Smart Chair — Posture & Occupancy Monitoring System** — Nov – Dec 2025

- Built a Bluetooth-connected posture and occupancy monitor from thin-film pressure, PIR, and ToF sensors — hand-soldered the full sensor array and implemented sensor-fusion logic to improve occupancy-detection accuracy.

**Additional Projects**

- **Autonomous Differential-Drive Robot (Penn) —** Dual-ESP32: Molex harnessing, Vive/IMU wiring, PID wall-following.
- **Streamline Your Drive (REVA) —** Smart parking & EV/CNG monitoring (IR, ultrasonic, RFID, GSM/GPS) on ESP32.
- **Autonomous Robotic Vehicle (REVA) —** ATmega328 obstacle-avoidance robot, embedded C, 2–400 cm ultrasonic.

## CERTIFICATIONS & HONORS

- Altium Designer Essentials (2026) · Tech Expressway Program, Accenture (2024) · Altium Education recognition — UPenn Demo Day 2026
